# HAMID NADEEM

**Software Engineer | Full-Stack Developer | DSA & OOP | C++ · Java · JavaScript**

+92 370 475 5352 · hamidnadeemn043@gmail.com · linkedin.com/in/hamid-nadeem043 · github.com/hamidnadeem043

## PROFESSIONAL SUMMARY

Software Engineering student (5th semester, CGPA 3.3) at Superior University, Lahore, with a versatile foundation spanning full-stack web development, data structures & algorithms, and object-oriented systems design in C++, Java, and JavaScript. Completed three software development internships delivering production-grade web features across the complete stack, alongside independent DSA-based console applications built with file handling and OOP principles. Comfortable moving between web development, backend/systems programming, and applied AI, with a strong problem-solving mindset, clean coding habits, and proven collaborative/team-project experience. Actively seeking roles across Software Engineering, Full-Stack Development, and Backend/Systems Development.

## TECHNICAL SKILLS

| | |
|---|---|
| **Languages** | C++, Java, JavaScript (ES6+), Python, SQL |
| **Core CS** | Data Structures & Algorithms (Linked List, Stack, Vector/ArrayList), Object-Oriented Programming (OOP), File Handling, Exception Handling |
| **Frontend** | React.js, HTML5, CSS3, Tailwind CSS, Redux, Responsive Design |
| **Backend** | Node.js, Express.js, REST APIs, JWT Auth, Socket.io, MVC Architecture |
| **Databases** | MongoDB, MySQL |
| **Cloud & Tools** | Git, GitHub, Vercel, Railway, Linux/CLI, VS Code, IntelliJ IDEA |
| **AI & Tech** | Google Gemini API, Prompt Engineering, GenAI Workflows |
| **Payments & Media** | Stripe, Cloudinary |
| **Collaboration** | Slack, Jira, Agile Workflows, Git-based Team Projects |

## EXPERIENCE

**Software Development Intern** · *IIFA Tech — On-site* Jun 2026 – Present

- Develop and maintain full-stack web features using React.js, Node.js, Express.js, and MongoDB within an agile team environment.
- Design and implement RESTful API endpoints, contributing to code reviews and ensuring adherence to software development best practices.

**Full-Stack Development Intern** · *Decode Labs — Remote* May 2026 – Jun 2026

- Built and delivered full-stack application features using React.js, Node.js, Express.js, and MongoDB; resolved bugs across the frontend and backend layers.
- Designed RESTful API endpoints and participated in structured code reviews, improving code quality and team delivery speed.

**Web Development Intern** · *Oasis Infobyte — Remote* Apr 2026 – May 2026

- Translated UI/UX design specifications into modular, reusable React.js component architectures following software engineering best practices.
- Integrated frontend components with backend REST endpoints, enabling live data rendering and improving overall application performance.

## DSA & OOP PROJECTS (C++ / JAVA)

**Bank Management System** | *C++ Console Application · Team Project*

- Built a menu-driven banking system in C++ enabling account creation, deposits, withdrawals, balance enquiry, and record modification/deletion, applying core OOP concepts, functions, conditionals, and loops.
- Implemented persistent file handling to store and update customer account records across sessions, using a temporary-file update strategy for safe record edits.
- Collaborated as part of a team, contributing to design (documented via a Software Requirements Specification) and implementation.

🔗 github.com/.../Bank-management-system-C-

**Bus Reservation System** | *C++ Console Application · Data Structures & Algorithms*

- Developed a console-based bus reservation system in C++ with separate admin (add/remove/view buses) and user (search, book, cancel seats, view history) workflows.
- Applied core data structures — Linked List, Stack, and Vector — alongside dynamic memory allocation and file handling to manage bus and booking records.

🔗 github.com/.../Bus-Reservation-System-DSA-C-

**Bus Reservation System** | *Java Console Application · OOP*

- Built a Java-based bus reservation system with admin authentication and user booking/cancellation flows, applying OOP principles including classes, objects, encapsulation, and constructors.
- Used ArrayList/Linked List and Stack data structures with file handling and exception handling for robust, menu-driven data management.

## FULL-STACK WEB PROJECTS

**SkillBridge** | *Full-Stack Freelance Marketplace*

- Engineered a complete freelance marketplace platform featuring real-time messaging (Socket.io), secure Stripe payment processing, Cloudinary media management, JWT-based authentication, and a buyer/seller review system; built with React.js, Node.js, Express.js, and MongoDB, deployed on Vercel and Railway.

🔗 skillbridge-gamma-eight.vercel.app

**AI-Powered Chatbot** | *Conversational Web Application*

- Developed an AI-driven chat application integrating the Google Gemini API to deliver real-time intelligent responses with markdown rendering and a persistent chat history sidebar using React.js and Tailwind CSS.

🔗 ai-chatbot-react-tailwind.vercel.app

**Inkwell** | *Full-Stack Content Management System*

- Built a full-stack blog CMS with JWT-protected author routes, custom React hooks, and complete CRUD functionality powered by a RESTful Node.js/Express API backed by MongoDB.

🔗 inkwell-blog-cms.vercel.app

**Inventory Manager** | *Full-Stack Inventory Management System*

- Designed and developed a full-stack inventory management application featuring admin session authentication, product CRUD operations, low-stock alerts, category/search filters, and a real-time dashboard using Node.js, Express.js, MySQL, and EJS.

**Also built:** Simon Says Game · Responsive To-Do App · Personal Portfolio · Spotify UI Clone

## EDUCATION

**BS Software Engineering · Superior University, Lahore** — Oct 2024 – Present
*5th Semester · CGPA: 3.3 · Expected Graduation: 2028*

**FSc Pre-Engineering · FG Degree College** — Aug 2022 – May 2024

## CERTIFICATIONS

- Full Stack Development Virtual Internship — DecodeLabs · Jun 2026
- Networking Basics — Cisco Networking Academy · May 2026
- GenAI Powered Data Analytics Simulation — Tata (Forage) · May 2026
- Front-End Software Engineering Simulation — Skyscanner (Forage) · May 2026
- Robotics & Controls Simulation — Johnson & Johnson (Forage) · May 2026
- Prompt Engineering for Everyone — Cognitive Class (IBM) · May 2026
- Computer Foundations Certificate (Office 2019) — Peak Solution College · Oct 2022
