ABOUT

I started my dev journey through Apna College's full-stack program — building projects from scratch until things actually worked. That hands-on foundation led me to two back-to-back internships: at Decode Labs, where I ship full-stack MERN features and learned what production code really looks like; and at Oasis Infobyte, where I turned design specs into live, data-connected React interfaces. Along the way I built things I'm genuinely proud of — SkillBridge, a real-time freelance marketplace with Stripe payments; an AI chatbot powered by Gemini; Inkwell, a full-stack blog CMS; and an Inventory Management System with session auth and a glass-morphism UI. Currently a 5th-semester BS Software Engineering student (CGPA 3.3) at Superior University, Lahore, looking to join an engineering team where I can contribute from day one.

EXPERIENCE

MERN Stack Web Development Intern · Decode Labs — Remote *May 2026 – Present*
- Building full-stack features using React, Node.js, Express, and MongoDB; designing RESTful API endpoints, resolving bugs across the stack, and participating in structured code reviews.

Full-Stack Web Development Intern · Oasis Infobyte — Remote *May 2026*
- Converted design specs into modular React component architecture; integrated frontend views with backend REST endpoints for live data rendering.

PROJECTS

SkillBridge · MERN · Socket.io · Stripe · Cloudinary · Redux · JWT
- Full freelance marketplace with real-time messaging (Socket.io), Stripe payment processing, Cloudinary media storage, JWT auth, and a buyer/seller review system.
- Built REST API with Express & MongoDB; managed global state with Redux. Deployed on Vercel + Railway.

Live: skillbridge-gamma-eight.vercel.app · GitHub: github.com/hamidnadeem043/skillbridge

AI Chatbot · React · Tailwind CSS · Gemini API
- Integrated Google Gemini API to deliver real-time AI responses with markdown rendering and a persistent chat history sidebar.

Live: ai-chatbot-react-tailwind.vercel.app

Inkwell · MERN · JWT Auth · Context API
- Full-stack blog CMS with JWT-protected author routes, custom hooks, and complete CRUD operations on a Node.js/Express REST API backed by MongoDB.

Live: inkwell-blog-cms.vercel.app

Inventory Management System · Node.js · Express · MySQL · EJS
- Full-stack inventory app with admin session auth, product CRUD, low-stock alerts, and category/search filters, with a glass-morphism UI and live dashboard.

Live: inventory-management-system-production-1962.up.railway.app

Also built: Simon Says Game · Responsive To-Do App · Pizza Delivery App · Bus Reservation GUI (Java) · Spotify UI Clone

TECHNICAL SKILLS

Core Stack: React.js, Node.js, Express.js, MongoDB, REST APIs
Frontend: JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Redux, Responsive Design
Backend & Auth: JWT Authentication, Socket.io, RESTful API Design, MVC Architecture
Payments / Media: Stripe, Cloudinary
AI Integration: Google Gemini API, Prompt Engineering, GenAI Workflows
Languages: JavaScript, Python, Java, C++, SQL
DevOps & Tools: Git, GitHub, Vercel, Railway, VS Code, Linux/CLI

EDUCATION

BS Software Engineering · Superior University, Lahore *Oct 2024 – Present*
5th Semester · CGPA: 3.3 · Expected Graduation: 2028

FSc Pre-Engineering · FG Degree College *Aug 2022 – May 2024*

CERTIFICATIONS

- Networking Basics — Cisco Networking Academy · May 2026
- GenAI Powered Data Analytics Simulation — Tata (Forage) · May 2026
- Front-End Software Engineering Simulation — Skyscanner (Forage) · May 2026
- Robotics & Controls Simulation — Johnson & Johnson (Forage) · May 2026
- Prompt Engineering for Everyone — Cognitive Class (IBM) · May 2026
- Computer Foundations Certificate (Office 2019) — Peak Solution College · Oct 2022
